INSTRUCTIONS:

1. Clean and dry the switch plate on your wall.
No need to remove it.
2. Print your switch plate covers on paper or #110 card stock.
3. Using an Exacto knife, cut out the inside parts where the light switch and outlet plugs will be.
4. Then cut out the switch plate covers.
5. Brush ModPodge or thinned Elmers glue over the switch plate on the wall.
6. Align and place the printed switch plate cover.
Smooth out any wrinkles or bubbles.
7. Allow to dry completely.
8. Most people prefer to spray a light coat of Krylon acrylic to protect the artwork from smearing.
9. After applied as instructed above, design will cover the screws and allow complete design to be seen.
10. If you want to remove the cover, just wet it with a sponge and rub to remove.
